

News: Presentation at Yewchung International School

Dr. Ada Gao and associated orthodontist Dr. Zhe Lee had a presentation for the Year 3 students in Yew Chung International School on Feb.8. Within an hour, the kids were excited to learn the correct dental hygiene and prevention of tooth decay. When our dentists showed them the right postures to brush and floss teeth with a mouth model, they were eagerly involved. Both the teachers and students were satisfied with DDS's presentation and looking forward for our future dental health and care involvement in the school.
